Projects

- **Pxalm**
  Mentorship app, which will be used to connect mentors and mentee based on the type pf mentorship (Live or offline) required by mentee.A user can be a mentor and a mentee, there will be toggle option for both. One of the profile either mentor or mentee needs to be set as default. There will be a onboarding process for both. One who will upload govt id or skill certification will get verified badge once approved by admin. Other who won't upload id still be able to provide mentorship.
- **OxVirtualCare**
  Ox Virtual Care give you access to the widest variety of market leading monitors, the best clinical user experience, and seamless integration with your other clinical systems.
- **EKG**
  The Goal of EKG is to provide platform for patient to submit the ekg report for the review at any time in very flexible manner to save the time of patient and provider. The application providing one good feature library management which is used by the patient to gathering the information for the final interpretation which is given by the doctor after checking ekg report.
